What's wrong with music reviews?

# Our App

- Like Rotten Tomatoes for music
- Users and critics
- Add music
- Write reviews
- Search
- Profiles
- Aggregate reviews
- Compare items

# Users

- Anyone who listens to music

# App Highlights

- Critic vs user reviews for songs and albums (with aggregate scores)
- Team Choice: Search

## Highest-Rated Songs

Name	Artist	Play
Tonight, tonight	Smashing Pumpkins	▶
Waltz for Debby	Bill Evans	▶
Waltz for Debby	Bill Evans	▶
Piano Sonata in G major, KV 283	Ivo Pogorelich	▶
The Incredible Jazz Guitar of Wes Montgomery	Wes Montgomery	▶

User Score: 67/100

Review	User	Score
Airegin? Nigeria? Good interpretation.	<a href="#">bob_smith</a>	89
It was an okay song	<a href="#">john_doe</a>	45

- Highest rated songs displayed on profiles

# Demo!

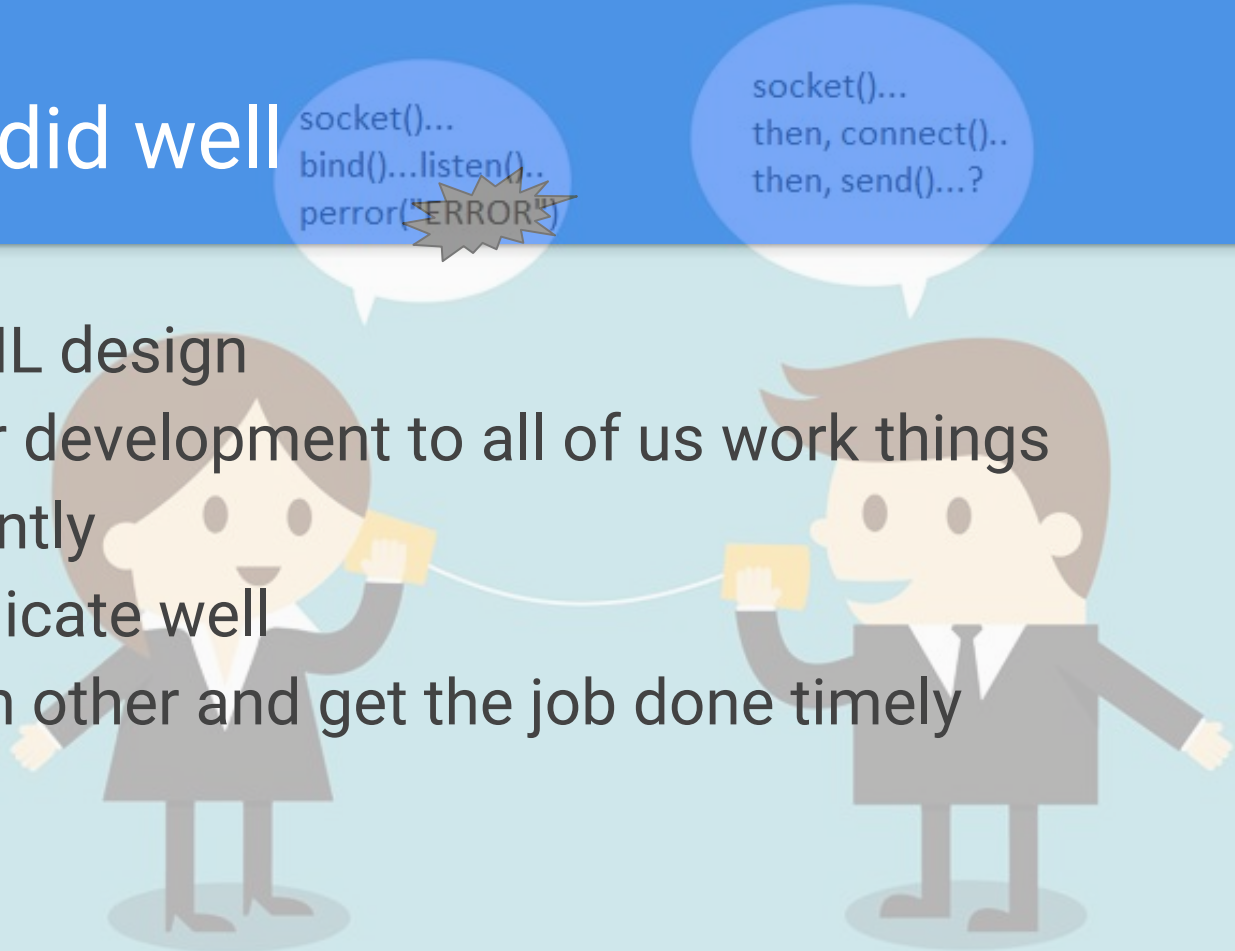

# Difficulties

- Getting used to Git
- Multiple people manipulating database at once
- Users vs Critics
  - From two different User data models to one
  - Using django groups features to distinguish
- Forms with associations
  - A review had to be associated with a user

# What we did well

- Good UML design
- Layer our development to all of us work things concurrently
- Communicate well with each other and get the job done timely

# Future Features

- Play song feature
- Music visualization in-app.
- More search features
  - sEarCh bY EmoJI
